

Peak Performance is pleased to announce that Peak is now the **first** certified vendor for Georgia Workers Compensation EDI. Thanks mostly to the hard work of our associates and client trading partners, we were able to satisfy the **full** Georgia testing requirements. Six trading partners participated in the testing and after a few hurdles with the state, testing went quite smoothly.

What “Certified” means for the rest of the GA Partners –

The biggest benefit is greatly reduced, communications testing where the partners will only have to submit 1 FROI-00 and 1 SROI – IP transaction. Once both are accepted, new trading partners are immediately moved to production status. Currently the GA mandate is July 1st and we currently have over 50 partners waiting for GA implementation. These partners will be implemented in a phased approach based on volume and completed paperwork.

If you are not currently working with the implementation team and are interested in getting set up for GA, please contact Peak at claimssupport@peakpsi.com, and we will work with you to meet the July 1 mandate. We have a Phase 5 planned if necessary, but Pam Carter at GA assured us that our partners won't be penalized since we are working to get everyone set up as quickly as possible.
