## **Peak Performance Announces the Acquisition of Claims Harbor**

**Columbus, OH, April 1, 2008:** Peak Performance, through its wholly owned subsidiary Envision Technology Solutions, Inc. [www.envision-ts.com](http://www.envision-ts.com), has announced the acquisition of Claims Harbor [www.claimsharbor.com](http://www.claimsharbor.com), which offers insurance applications and services for the Property & Casualty Insurance markets. Claims Harbor has over 250 clients that include insurance carriers, state funds, third-party administrators, employers, managed care organizations and a host of IT vendor companies. Claims Harbor is a business unit of Harbor Payments, which was acquired by American Express in 2007. The terms of the transaction were not disclosed.

Envision's acquisition of Claims Harbor expands its business intelligence offerings, compliance solutions, workflow automation, managed care, and claims management solutions. Claims Harbor has four main business offerings that include a full, all-lines claims and workflow automation system Claims3, a managed care platform EC Care, workers compensation EDI compliance reporting services, and ACES an accelerated case management system. All of these solutions are available as client hosted offerings, web services, and SAS-Certified, Level II Data Center Applications Services Provider (ASP) solutions.

Bob Seese, President of Envision, said "We are excited to bring Claims Harbor's line of business offerings to Envision's family of proven solutions. This addition enhances our ability to optimize our end-to-end insurance and risk management software and technology workflows. Envision's acquisition of Claims Harbor continues our corporate strategy of acquiring mature and proven insurance and risk management software solutions, enhancing them with modern technology capabilities and extended functionality, to provide comprehensive solutions that optimize your business performance."

Envision is acquiring the assets of Claims Harbor and will retain the Claims Harbor office in Atlanta, Georgia. Many of Envision's customers utilize services of Claims Harbor today. The strategy of Peak Performance is to develop and acquire insurance and risk management specific technology solutions to bring innovative approaches generating high ROI solutions to its customers in the property and casualty industry.

### **About Peak Performance and Envision**

Founded in 2004, Peak Performance offers a comprehensive insurance processing solution for Property & Casualty insurance organizations and risk management solutions that deliver measurable and significant ROI, from reducing operating costs to improving loss ratios. Peak's unique approach combines mature and proven software solutions with web services and other modern technologies to redefine end-to-end processing. Others look to end-to-end as little more than automating processes from policy and claims, while we extend the definition to include streamlining processes throughout the entire operation. Peak acquired Envision Technology Solutions in 2006. Envision has been a premiere provider of claims and risk management technologies since 1994. Its award-winning, web-based risk management information system, RiskEnvision, is in use by Fortune 500 companies, Third-party Administrators, Healthcare systems, States, Pools, and Municipalities across the U.S. and Mexico. Envision is known in the industry for their consultative expertise and attentive customer service.
